

Our draft emissions reduction plan advice 2023

He Pou a Rangi
Climate Change Commission

What we will cover today

1. The context for change
2. Low emissions options
3. Creating an enabling environment for lasting change

Our role

**We provide independent, evidence-based
advice to government on climate issues**

How this draft advice is different from last time

- Building on the work already progressing under the first emissions budget period
- Identifying critical gaps, where actions need to be urgently strengthened or accelerated

The task for the second emissions budget

- Meeting the emissions budgets requires concerted and timely action across all sectors
- The Government needs to accelerate action across every sector

Meeting the emissions budgets requires concerted and timely action across all sectors
